Summary

AI-focused Data Scientist specializing in natural language processing, deep learning, and model fine-tuning. Experienced in developing and optimizing language models and generative AI solutions. Passionate about building intelligent systems that enhance decision-making and automate complex tasks.

Education

Bachelor of Engineering - BE, Electrical Communication and Electronics (2019 – 2024)
Mansoura University.

- **Graduation project**
 - ✓ **Diabetic Retinopathy Classification** – Developed a deep learning model for detecting diabetic retinopathy. Applied image processing, data preparation, transfer learning, and model deployment.

Certificates

- The AI Engineer Bootcamp (NLP, Transformers, LLMs, LangChain, Hugging Face, APIs)
- Machine Learning Specialization (3 courses) (DeepLearning.AI)
- Mathematics for Machine Learning and Data Science Specialization (3 courses) (DeepLearning.AI)
- Database and SQL for Data Science with Python (IBM)
- Share Data Through the Art of Visualization (Google)
- Ask Questions to Make Data - Driven Decisions (Google)
- Data Cleaning (Kaggle)
- Python (3 courses) (University of Michigan)

Skills

Technical Skills:

- AI agent development, multi-agent systems, automation with AI
- Langchain, Model deployment, API integration, transfer learning
- Fine-tuning LLMs, prompt engineering, retrieval-augmented generation (RAG)
- Python (Pandas, NumPy, Matplotlib, Seaborn) – Machine Learning
- SQL, Git, GitHub
- Scikit-learn, NLP tools (Hugging Face, Transformers)
- Data cleaning, feature engineering, and Arabic text processing
- Zero-shot learning, fine-tuning models, Arabic text processing
- Git, GitHub
- Business intelligence analysis, Power BI, Tableau, EDA

➤ **Soft Skills:**

- | | |
|-----------------------|---------------------|
| - Analytical Thinking | - Problem-Solving |
| - Attention to Detail | - Communication |
| - Team Collaboration | - Time Management |
| - Business Acumen | - Critical Thinking |

Projects

✓ **AI Reporter Agent :**

Developed a multi-agent system for automated product research and reporting. Agents generate optimized search queries, retrieve product details from commercial websites, perform web scraping, and compile insights into a professional HTML report. Integrated LLMs, retrieval-based search, and automation for efficiency.

✓ **Fine-Tuning and Deploying Large Language Model:**

Developed and deployed a fine-tuned large language model (LLM) using advanced techniques such as knowledge Distillation and Parameter-Efficient Fine-Tuning (PEFT)

✓ **Side Data Science Projects:**

Developed multiple AI projects leveraging Hugging Face Transformers for zero-shot learning, fine-tuning, and text classification. Applied LLMs for predictions, sentiment analysis ,multi-class classification across various domain and predictions projects.

Personal Info

- **From Port Said, Egypt**
- **Military Status: Exemption**

Volunteering

- **Business coordinator** at "Student for Egypt faculty of Engineering Mansoura University"
